Key Projects

RideSync - Intelligent Transit Booking, Tracking & Fare Management Platform
Mobile Developer | Capstone Project GitHubRepo: <https://github.com/Rishikesan05/RideSync-App-Development.git> 📄

- Tech: Flutter, Dart, Firebase, React.js, REST APIs, Gemini AI**
- Contributed to mobile frontend and backend development for the Passenger and Operator applications, implementing bus booking, seat selection, fare breakdown, booking confirmation, payment, and user profile features through RESTful API and Firebase integration.
 - Implemented real-time GPS tracking, route optimization, distance-based fare management, and seat management, supporting integrated Passenger, Operator, and Admin functionalities.

Makeupbrand_MAYO - Full-Stack E-Commerce Platform
Web Developer | Individual Project GitHubRepo: https://github.com/MayooriEkanthan/Makeupbrand_Mayo.git 📄

- Tech: MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, REST APIs**
- Developed a responsive e-commerce platform using React.js and Tailwind CSS, with product browsing, navigation, reusable components, and shopping cart functionality.
 - Developing the Node.js/Express.js backend with MongoDB and REST APIs for authentication, product management, orders, and payment processing.

DiaSaver - AI-Powered Diabetes Risk Prediction Web App
Full-Stack & ML Developer | Group Project GitHubRepo: <https://github.com/MayooriEkanthan/DiaSaver.git> 📄

- Tech: Python, Scikit-learn, Pandas, NumPy, Flask, React.js, MySQL**
- Contributed to preprocessing and feature engineering of healthcare dataset features and trained supervised machine learning classification models using Scikit-learn for diabetes risk prediction.
 - Developed a Flask REST API for real-time model inference and integrated it with a responsive React.js frontend for dynamic risk assessment and recommendations.

Zellynx - Smart Stock Clearance & Analytics Platform
Mobile App Developer | Group Project GitHubRepo: <https://github.com/MayooriEkanthan/Zellynx.git> 📄

- Tech: Flutter, Dart, Firebase Realtime Database, Cloud Firestore, REST APIs**
- Contributed to mobile application development, implementing expiry-based inventory tracking, automated notifications, and stock clearance strategies to reduce product waste.
 - Developed real-time data synchronization and analytics features, supporting inventory management, product clearance, and data-driven profitability decisions.
